

Abstract of the Disclosure

In a simulation calculation service providing method, a simulation calculation condition is received from a user terminal apparatus as a user presented condition. The received user presented condition is registered. A bidding condition from a consultant in correspondence with the registered user presented condition is received from a consultant terminal apparatus. The user presented condition is compared with the bidding condition, and a bidding condition that coincides with the user presented condition is selected. The user terminal apparatus is inquired about whether the simulation calculation is to be executed on the basis of the selected bidding condition. The simulation calculation is executed in accordance with an answer to the inquiry. A simulation calculation service providing system, a server system, and a program are also disclosed.
